Points to note when you agree contracts

1. Liability accepted under contract. The liability policies cover the liability Kestrel would have had in law without the contract. Liability you accept under a contract beyond that, for example an indemnity, a waiver of a limitation or liquidated damages, is not covered unless insurers agree in advance. Please send us any contract that asks for unlimited liability or an indemnity before it is signed.

2. Aggregate limits. The products liability limit and the cyber limit are aggregate limits: GBP 10,000,000 and GBP 5,000,000 are the most insurers will pay for all claims of that kind in the period, across all customers. Where a customer asks for cover "for each and every claim", please check with us before you confirm it.

3. Cyber. Fines and penalties are covered only where they are insurable by law. Contractual penalties and service credits are excluded.

4. Professional indemnity covers design and advice, including advice given through the remote condition monitoring service.

5. Certificates. We can issue certificates of insurance for customers on request; please allow two working days.

6. Changes. Please tell us before you start new activities that may change the risk, for example sales to the USA or Canada, acquisitions, or new services.
